# Making eyes

[video for adding bead eyes: <https://youtu.be/s16XArz4IIU>]

After choosing your yarn you can get a rough estimate on how you want to make your eyes. There are two main options for eyes when making your amigurumi.

Using solid bead eyes (red above):

These are solid plastic beads that you snap onto your product before closing up. You can usually find these at craft stores like Joann's or Michaels.

In the image on the right, the triceratops made with Lion Brand Vanna's Choice (left) uses a size 8mm eye, where-as the one made with Lily Sugar n' Creme (right) uses a size 6mm. Make sure to be weary of the size of your yarn and the size of the eyes.

Using Bullion Knots (blue above):  
Another method is using yarn and a needle and making bullion knots. This is a pretty easy method and really useful if you cant find the beads, or the area is too small for the beads.

# Choosing a yarn

Before making our mini we have to think about what kind of yarn we want to use! Check out these two triceratops made with two different kinds of yarn:

The one on the left is made with Lion Brand Vanna's Choice, a weight category of 4 and a size I9/5.50mm crochet hook, and the one on the right is made with Lily Sugar n' Creme, with a weight category of 3 and a size G6/4.00mm crochet hook.

Keep in mind the size of your yarn and crochet hook when making amigurumi. Too big of a yarn / hook and you could be left with holes making it tough to stuff, too small of a yarn / hook and the pattern might be too difficult to complete!
